

An Environmental Management Plan for Bear Island!

Let's Recap - What is an Environmental Management Plan?

An Environmental Management Plan (EMP) is a document that identifies existing and potential future environmental issues. It also identifies actions to address these issues. Actions can range from educational materials to environmental policies and/or laws.

Why are we creating an EMP?

With the adoption of our Land Code, we have reclaimed our ability to govern and manage our reserve lands and resources. With this responsibility comes the need to take care of our lands and resources for the benefit of current and future generations. The development of the EMP is an important process that will help us maintain and improve the environmental health and quality of our community lands.

Environmental Management Priorities

Based on what we have heard so far, the environmental management priorities that will guide the development of the EMP are:

Land Development

Surface Water and Groundwater

Contamination and Fill Management

Vegetation and Wildlife

Food Security

Solid and Hazardous Waste Management

Air Quality

Renewable Energy

Climate Change

Feb 7 **What is next?**

Community Engagement Session #2 on the EMP.

When: 5:00 p.m. – 8:30 p.m.

Where: Lakeview Gathering Place

**Dinner
provided**
