## **COMMUNITY UPDATE**

### **Regional Forest Fire Information**

**10 June 2023**

---

Given the current environmental conditions, and ongoing fires in Quebec, the community emergency response team is actively working to be prepared for emergency.

#### **Emergency Preparedness**

We want to ensure, that we as a community and individuals, are prepared in case of emergency.

Currently, our area forest fire danger rating is high. There is one forest fire listed by MNR on Daki Menan (see added pages for information on that fire). The fire location is West of New Liskeard and North of Lady Evelyn Lake, it is listed at 2100 hectares and not under control.

The weather forecast shows significant rain will start Sunday night, with a total expected accumulation of 30-35mm (Approx. 1.25") by Tuesday morning. Given this is a short-range forecast, we are hopeful we do get the much-needed rain. While this rainfall will likely not be enough, it will help.
